The 150lb concrete anchor makes securing your dock simple and easy. After you’ve set your dock into position, anchor it down and fasten with chains to ensure it is safe and secure. With this system you can leave the anchors in the water over the winter, simply attach a float to the chains when disconnecting from the dock and re-attach when installing the dock the next season.

Specifications: 16” x 20” x 9” (L x W x H)
150lb Concrete Anchor
5/8” Rebar Handle

The 150lb concrete anchor makes securing your dock simple and easy. After you’ve set your dock into position, anchor it down and fasten with chains to ensure it is safe and secure.
